Thermoplast®
Permanent Development S.A.

www.thermoplast.eu

Thermoplast was established in Poland in 1989 as a Polish-Swiss registered partnership, specializing in production of plastic profiles. For years we have been supplying innovative profiles in terms of shape, material and functionality for various industries, including furniture. Our offer of finishing profiles for furniture is rich both in terms of product and colour range.

We use highest quality plastics from proven suppliers for the production of furniture profiles. We extrude profiles with a weight of 15 g/m to 3500 g/m, using 24 modern production lines. In the final processing we use foiling, printing, stamping, drilling and bending.

ALL PRODUCTION PROCESSES ARE CERTIFIED ACCORDING TO PN ISO 9001
STANDARD AND ENVIRONMENTAL INSTRUCTION 1401.

“ SEALING PROFILES

Sealing strips are made of high quality PVC. Thanks to excellent sealing properties, strips have many applications. In our offer, we have profiles that are an alternative to silicone joints used to seal the worktop in your kitchen or bathroom ceramics elements, and sealing strips for furniture tops and plinths. Easy and quick assembly of our sealing profiles is an additional benefit for customers.

“ UNIVERSAL APPLICATION

ANTI SLICON is a sealing profile that ideally fits the joining of perpendicular surfaces. A simple and quick way to finish the connections between kitchen worktop and wall or sink, bathtub and wall. Sealing used instead of silicone is waterproof and antibacterial.

Thanks to flexibility and small thickness of the tape (1 mm), the assembly of the sealing is extremely fast and easy, allowing to use the profile in narrow gaps. The sealing is available in colour suited to the range of silicone colours available on the market.

COUNTERTOP AND PLINTH SEALINGS

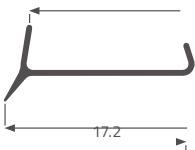

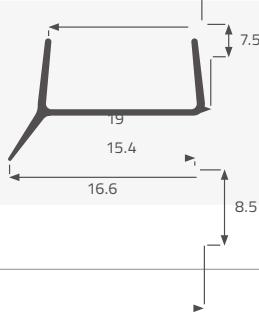

Sealings designed for countertops and under plinths effectively protect them against penetration of dirt and moisture. They are a discreet finish of gaps between top and wall, or plinth

and floor. Functionality, simple assembly and exceptional aesthetics are their main advantages.

“WALL SEAL PROFILES

Wall seal profiles are an aesthetic finish of the utility surface in your kitchen between wall and kitchen countertop. Construction of the wall seal profiles guarantees simple assembly and perfect adhesion of the profiles to the wall and countertop. Thermoplast has a wide range of wall seal profiles, together with finishing accessories (internal and external corners, end profiles). Profiles are made of best quality materials and allow customers to enjoy impeccable quality. Modern design and a wide range of colours will satisfy the tastes of the most demanding customers.

“ PROFILES C AND T

C and T profiles have long been one of the best methods of finishing furniture. Thanks to the use of high quality materials, our C and T profiles are extremely resistant to abrasion and impact, which protects the furniture panels against damage during operation. It is a simple and aesthetic finish of furniture, tables or countertops.

“PROFILES H, J

This group of profiles includes structural profiles for joining and securing furniture boards, H and J. Profiles of this type allow for aesthetic connection of two boards in one plane with a very gentle transition from one to the other. With these profiles, simple assembly eliminates the imperfections of traditional panel joining.
